NUMBER 4

Trinity College Bulletin

Reports of
The President, The Dean,
The Librarian, and The Treasurer

HARTFORD, CONNECTICUT

October, 1930

TRINITY COLLEGE BULLETIN

Issued quarterly by the College. Entered January 12, 1904, at Hartford, Conn., as second class matter under the Act of Congress of July 16, 1894. The Bulletin includes in its issues: the College Catalogue; Reports of the President, Treasurer, and Librarian; Announcements and Circulars of Information.

Accepted for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917, authorized March 3, 1919.

Report
of
The President
to the
Trustees of Trinity College

November 1, 1930

The Board of Trustees of Trinity College.

REV. REMSEN B. OGILBY, LL.D., L.H.D., PRESIDENT,*	Hartford.
ROBERT THORNE, LL.D.,	New York.
THE RT. REV. CHAUNCEY B. BREWSTER, D.D.,	Hartford.
THE HON. JOSEPH BUFFINGTON, LL.D.,	Philadelphia.
FRANK L. WILCOX, B.A.,*	Berlin, Conn.
WILLIAM G. MATHER, LL.D.,	Cleveland.
JOHN P. ELTON, B.S.,	Waterbury, Conn.
CHARLES G. WOODWARD, M.A.,* SECRETARY	Hartford.
SAMUEL FERGUSON, M.A.,	Hartford.
SIDNEY T. MILLER, LL.D.,	Detroit, Mich.
NEWTON C. BRAINARD, B.A.,*	Hartford.
EDWARD MILLIGAN, M.A.,*	Hartford.
GRENVILLE KANE, L.H.D.,	New York.
GENERAL JAMES G. HARBORD, LL.D.,	New York.
LEWIS G. HARRIMAN, M.S.,	Buffalo.
HON. PHILIP J. MCCOOK, LL.D.,	New York.
CHARLES E. HOTCHKISS, LL.B.,	New York.
THOMAS W. RUSSELL, B.A.,	Hartford.
JAMES L. GOODWIN, B.A.,	Hartford.
CHARLES F. SMITH, M.A.,*	New Britain.
RICHARDSON WRIGHT, M.A.,	New York.
WILLIAM H. EATON, B.S.,	Pittsfield, Mass.
MARTIN W. CLEMENT, B.S.,	Philadelphia.
JAMES A. WALES, B.A.,	New York.

* These members of the Board form the Executive Committee.

Advisory Board.

WILLIAM S. COGSWELL, LL.D.,	Jamaica, N. Y.
THE RT. REV. ERNEST M. STIRES, D.D.,	Garden City, L. I.
EDGAR F. WATERMAN, LL.B.,	Hartford.

ROGER H. MOTTEN, Litt.D., TREASURER	Wethersfield.
---	---------------

PRESIDENT'S REPORT

As it is now ten years since I assumed my duties as President of Trinity College, it seems good to me to make this present report cover not only the past academic year but also all the years of my administration, with some comment on the progress made and some definite words as to the future, immediate and ultimate. It should be remembered that I took over the College not directly from the hand of my predecessor, Dr. Luther, but from an Acting-President, Professor Perkins, appointed to serve during the interregnum between Dr. Luther's resignation and my election. To the ordinary difficulties of an acting-president there was added to Professor Perkins' load the problem of bringing back the College to a normal basis after the hectic war years. Accordingly a comparison between the Trinity of 1920 and the Trinity of 1930 is hardly a fair one. Still Professor Perkins performed his task well, and showed by his service how keen is his understanding of educational issues and how thoroughly he appreciates the particular problems of the college he has served for so many years.

There are four obvious physical indices by which one judges a college: the plant, the students, the faculty, and the finances.

1. *The Plant.* A first impression of the Trinity campus in 1920 was not prepossessing. One saw the solidity and the beauty of the original line of buildings, but the later additions were clearly so different in style and so inferior in construction that one got a suggestion of a college that had not succeeded in living up to its original aspirations. The campus still further bore out this idea. A large section of it was a pasture for cows, another part was cut up into vegetable gardens for our neighbors (a reminder of war-days), the fence around the athletic field was a cross between an eye-sore and a joke, and on the main campus one hundred feet from the statue of our Founder was a dump for ashes and garbage. The buildings themselves were in a fair state of repair, but the fact that several of the dormitory suites intended for students were occupied by married members of the faculty did not tend to increase respect for the institution.

It is small wonder, therefore, that in my impetuous eagerness for the welfare of the College I devoted a large part of my inaugural address to our building problem. It cried aloud for attention. I thought at that time that a program for new buildings should be the first claim upon the attention of our Board of Trustees. I was wrong, and I desire at this time to

record that fact and to register my confession. It became clear to me before my first year as President was over that our first task was to raise endowment for the College, and with that endowment to increase the salaries of our teaching staff. For a further discussion of the financial problems of the College, see below (page 19).

The raising of endowment is not a showy bit of service, and it makes little appeal to the younger, more vocal alumni. To them the College seemed at a stand-still during the first years of my administration. There had been no new construction on the campus for twenty years except the new library. Even participation in the Centennial, with all the enthusiasm of the celebration of that event in our history, did not convince many of real prospects for the future.

Some plans were however being made. The late S. Breck P. Trowbridge of the Class of 1883, appointed by the Trustees Consulting Architect of the College, drew up for the Centennial a sketch to indicate the location of future buildings, but he died before plans for any building were drawn. Howard Greenley '95 developed the Trowbridge plan into a definite layout which was approved in general by the Trustees; but it was not until June, 1928, that the turning of the sod for the first of three projected gymnasium units crystalized hopes into actuality. This building, built to include six squash racquet courts and a swimming pool, was completed and dedicated by October, 1929, the cost being contributed by alumni and friends of the College, some of them friends of Mr. Trowbridge, whose name the building bears. Our pride in the perfection of this unit and the enthusiastic use of it by students need no comment here.

The other two units of this gymnasium group should be built soon. One, the field-house, to all intent and purposes a covered baseball diamond, would give opportunity for the football squad in the fall and the baseball and track teams in the spring to get some training in bad weather. Many of our students would use it in the winter months. Several of our neighboring colleges have constructed such buildings recently, and the ideal dimensions, about 170 by 170, and the approximate cost, \$150,000, are fairly well established. Our plans call for the location of this field-house between the swimming pool building and Broad Street, while the main gymnasium is to be on the other side of the pool, the rear of it being built over the new central heating plant. The cost of this building would vary greatly with detail required. The use of brick for the Trowbridge Memorial has received favorable comment, and the two remaining units must resemble it in style as well as present a dignified façade, facing our athletic fields.

I recommend to the Board of Trustees that some firm of architects be asked, in consultation with Mr. Howard Greenley, to submit to us preliminary sketches, showing the general appearance of this group, and supplying us with such rough estimates of cost as they may be able to make.

In the fall of 1929, our Board, encouraged by the growth of the Cook Fund and cognizant of the need for more accommodations for resident students, authorized the drawing of plans for a line of buildings at the southern end of the campus, to turn the corner of the long line of our main buildings. First will come a small dining hall seating 125 to 150 students, followed by various dormitory units, and culminating in a much needed Chemistry Laboratory. The firm of McKim, Mead, and White was selected as the architects, and their long experience in college architecture would indicate a successful solution of our problems. It is hoped that the Commons and part of the new dormitories will be ready in the fall of 1931. As the old wooden Commons stood in the way of new construction, and as it will be necessary this year to have some eating place on the Campus, the old building was moved this summer to a site just south of Boardman Hall, which screens it from sight. It will serve to provide meals during this coming year for such students as do not eat at Fraternity houses, and afterward can be remodeled into living quarters for two of our janitors.

It might be well to put on record at this time that it is not the purpose of the administration of the college in building a new dining hall to make any change in our present custom as to meals. By long tradition the social unit of our undergraduate body is the fraternity. The greater part of our resident students eat in their fraternity houses, and this practice will continue. It is necessary, however, for the college to provide a commons for non-fraternity men, to be available also for fraternity men in times of emergency, and to make the residence on the campus of unmarried members of the faculty convenient and attractive. In addition, our new dining hall should perform a social service of real importance in making possible occasional dinners of an entire undergraduate class. While the fraternity serves well as a vertical unit to bind men together, the class must come into social self-consciousness as a horizontal unit, the force of which is felt more strongly after graduation. Already the annual dinner of the Faculty with the Freshman Class at the beginning of the year has proved its worth: it would be good if each one of the classes could dine in hall as a class in the new Commons, perhaps once a term. The civilizing influence of a common meal needs no emphasis; an occasional undergraduate function, perhaps with a bit of formality, might prove a valuable tradition for the College. In that connection this is a good chance to

express the hope that alumni pride will always be active to keep in the evening meal at the fraternity houses something of the dignity with which gentlemen dine together.

Much has been done lately in the way of improving our older buildings and making them of the greatest possible use. Congestion in the Chemical Laboratory has called forth all our ingenuity to make use of every possible bit of floor space in that old building until we have a new laboratory. Many alterations have been made in Boardman Hall, and this last summer the large windows in the south side of the building were replaced with new steel sash construction. The old wooden ones were in bad shape and might have collapsed in a driving storm, with resultant damage to our collections in the Museum. All of the dormitory sections in Jarvis and Seabury have been equipped with new bathrooms on the second or third floors, and may be considered as ranking in the first class of college dormitory accommodations. Northam Towers still remains a problem. The narrow wooden stairs are a fire-hazard and the general arrangement of the rooms unsatisfactory. At some time in the future drastic remodeling of the entire building must be undertaken.

Extended comment on our new Chapel is not necessary at this time: its potential beauty is beginning to speak for itself. We all have enjoyed the praise of our new gymnasium from outsiders who tell us that we have the best squash racquet courts in the country and a perfect swimming pool. Now we are looking forward to the gratification of having on our campus the most glorious College Chapel in America. In the realization of such perfection, we may well feel that we are carrying out the ideals of the founders of the College, of the Board of Trustees who planned the move to our present site, and that we are continuing in worthy form the architectural dreams of Burges, the architect who began the buildings we now have. Especially good is it to reflect that this Chapel is the gift of one of our own graduates, William G. Mather.

It should be clearly understood that it has been Mr. Mather's intention from the first to allow others to share with him in the pleasure that comes from contributing to the beauty of this House of God. A College Chapel gives many opportunities for individual memorials and gifts, and because of them grows more beautiful year by year. We shall none of us live to see the Chapel finished — perhaps we should hope that it will never be finished, because when finished it might cease to live. Chief among the gifts that have already been made for the Chapel is the memorial Dr. John F. Plumb of the Class of 1891 and Mrs. Plumb wish to make for their son Jack, who died in his senior year. This will

take the form of a carillon of thirty bells, which are now being cast in England.

Though in no way adding to the beauty of our college buildings and perhaps in some ways detracting temporarily from their appearance, the completion of our central heating plant is a real improvement in the operation of the college. We now have connected all our buildings except the old gymnasium with the central plant and confidently hope for more satisfactory heating as well as for possible reduction in cost of operation. In this important detail as well as in the supervision of the construction and repair of all our buildings, old and new, the College owes grateful appreciation to Charles J. Bennett of Hartford, who has now served for over a year as the college engineer. Keen of mind, a master of the technique of his profession, he has taken a heavy load off the administration and the Trustees. We can be confident that every part of the work he supervises will be well done. One of his last tasks this summer was to arrange for consolidating all the electric lines entering the campus into a single service. This will mean greater economy in operation and will in time do away with all the unsightly poles on the campus.

This mention of our central heating plant recalls to my mind the fact that ten years ago the College was heated by hard coal, consumed in three different boiler-rooms. Obviously this was an expensive form of heating and was occasionally far from satisfactory in its results. We changed first to soft coal, and now have a central heating plant, tended by two men who work in shifts. The time when we need plenty of heat in our dormitories in cold weather is at seven in the morning and from eight to eleven at night. Furnaces tended by janitors during a regular working day can hardly be expected to supply satisfactory heating. We shall get better results from our new plant and we ought to save money.

I should like to say a few words about our grounds. At the time of our centennial celebration a distinguished American, noted for his love for trees and for his generous gifts to encourage scientific forestry, let us understand how slow we seemed to realize the potential beauties of our site. His gifts to ensure scientific care of our elms on the main Campus and the planting of other areas have stirred us to activity in that direction, and the campus is a much more beautiful place than it was seven years ago. Professor Ferguson did much valuable planting during his lifetime, and the late Walter Schutz set out shrubs in important places during his term as assistant treasurer, but in no sense has the College ever taken full advantage of the possibilities latent in this ridge with its meadows sloping to the

east. I recommend that the development of our grounds should be a matter of real concern to the Trustees. We have made a beginning in doing away with the worst of the unsightly features which offended the eye ten years ago. For three years, 1924, 1925, and 1926, the Faculty declared an annual holiday, Campus Day, which was given over to the care of our grounds. Everyone took part, professors and students. The entire undergraduate body was divided into gangs, each one of which under the guidance of one or more members of the Faculty undertook a definite project for the beautification or the upkeep of the campus. This was interim action: more extended plans on a permanent basis must follow of necessity.

Our tract is a large one, however, and it will require constant vigilance to keep it clear of all rubbish, especially as we are open to constant invasion by small boy neighbors on every side.

I am glad to call the attention of the Trustees to the thriving condition of our elms, to the grove of red pine at the corner of Summit Street and Vernon Street, which is already a delight to the eye and will soon be a valuable wind-break, and to the planting at the south-east corner of our property, mostly white pines, which with the new gymnasium is beginning to screen out the unlovely prospect of the rear of the houses on Crescent Street. During the past year we have applied the bequest of Walter Schutz, designated by him to be used for the beautification of the campus, to the planting around the new gymnasium.

Last April during the Easter Recess we kept a dozen or so students here setting out shrubbery, planting trees, and caring for existing trees. Aside from the value of this to the College, the young men in question secured experience in practical forestry. We shall do well to continue this custom.

Two of our Trustees, Mr. Brainard and Mr. Wright, have at their own charge made permanent contribution to the beauty latent in our site. Mr. Brainard has planted and maintained a line of elms on our Broad Street front, for which succeeding generations will bless his memory. Mr. Wright had constructed a garden for the President's house, a riot of bloom in spring and fall and a real asset to the College.

I stress the following projects for the future:

1. A fence on our Broad Street front. Until we get that, to shut out undesirable trespassers, it will be impossible to keep our lower land to the east looking well. This project will probably have to wait until the contemplated widening of Broad Street is accomplished.

2. A campus policeman. This again is to minimize trespass. A policeman retired by the city on a pension would be

of real service and might prevent the dormitory robberies that are a constant source of irritation and distress.

3. Development of adequate parking places for professors and students.

4. Forestration of the pasture land to the south. We need here groves for the future, and could well establish a nursery cultivated by student labor which would provide trees to be transplanted to other places on the campus.

Let me close this discussion of our plant by citing our needs for the immediate future:

1. A new Chemical Laboratory. Cost.....	\$400,000
2. Remodeling of Jarvis Laboratory for department of Physics. Approximate cost..	50,000
3. Dormitory units for sixty men, in addition to those provided for by Cook Dormitory. Cost.....	200,000
4. Field-House (second unit of gymnasium). Cost.....	150,000
5. Main gymnasium (third unit). Approximate cost.....	300,000
6. Addition to Williams Memorial Building, providing for enlargement of Library and for a new Trustees' Room. Cost.....	50,000
7. Arched entrance to connect new Chapel with addition to Williams Memorial noted above. (Founders' Room above entrance). Cost.....	50,000
8. Fencing of Campus, new roads, parking places, planting, etc. Cost.....	50,000
Total.....	<hr/> \$1,250,000
Endowment for operation of Chemical Laboratory.....	\$100,000
Endowment for operation of Gymnasium, Swimming Pool, etc.....	150,000
	<hr/> \$1,500,000

2. *The Students.* One of the first questions asked by inquirers who wish to know about Trinity College is always, "How many students have you?" To many minds numbers constitute a final index of the success of an institution — just as if a college of a thousand men were twice as effective as a college of five hundred! The question, "How many students have you?" should invariably be followed by the companion

question, "And how many do you want?" Answered together the questions may have some value.

The number five hundred comes to mind when one thinks of a college of our type. For various reasons this number can be established as an excellent goal. A college of 500 men can be conducted with practically the same administrative staff as that required for a college of 250, and still allows of intimate contacts between professor and student. Beyond that number demands upon the administration begin to multiply and overhead costs run up. Our neighbor colleges, Wesleyan, Williams, and Amherst, have run up to over six hundred, but one of the three has already reached the conclusion that her numbers are slightly too large and plans to reduce rather than push the enrollment up.

Before the war our largest enrolment at Trinity was in the year 1914 when the college had 259 students.

In the fall of 1920 the number of students was 227. Small as this number was, it was necessary to reduce it still further during the year, for a number of men had been admitted who were not able to carry on college work. This left only 192 by June, 1921. In the years that followed, the growth of the college would have been more rapid if it had not been for a high mortality. Voluntary withdrawals for financial and other reasons and required withdrawal for scholastic deficiency were so numerous as to call for some anxiety. The net growth in the total number of students was small. Various factors such as improvement in the calibre of men admitted, increase of zeal on the part of the students, and the activities of a new dean have gradually combined to cut down that mortality until last year the college opened with a total enrollment of 312 and finished the year without any abnormal decrease in numbers. This fall the registration has reached a total that has taxed our dormitory accommodations beyond their capacity. No further growth in the size of the college is possible without new buildings. The worst congestion is in the Chemistry Laboratory.

Our instructions to the architects in directing them to draw plans for the new dormitories at the south end of the campus were to provide rooms for 120 men. That figure was determined by the following considerations:

1. It is felt by many that the number of students from Hartford and the immediate neighborhood who do not live on the campus should be definitely limited. While we have certain obligations to the city of Hartford and should do our share in contributing to the educational facilities of the city, it is not our intention to become a city college. On this point I am at variance with the policy of my immediate predecessor, Dr. Luther. It was his conviction that the welfare of Trinity could best be

secured by allying it with the industries of Hartford and making it partake of the nature of a technical institution. In my talks with him on this subject after his retirement, it was the only point upon which we ever disagreed — and it was a disagreement which in no way blurred our friendship or caused him to withhold any of his loyalty to my administration. In any event it is clear that our Board of Trustees never committed themselves to any definite step in the direction of departing from the original conception of Trinity as a cultural and pre-professional college, with the majority of her students in residence. The fact that authorities at our local High Schools have stated that in their opinion there are practically no male graduates of our Hartford High Schools properly prepared for college who are denied the privilege of a college education, coupled with the fact that Trinity awards each year, in addition to eligibility to all endowed scholarships, sixteen Hartford Scholarships, giving free tuition to sixteen Hartford boys, should satisfy any critic and compel admission that our present contribution to our home city is generous. This all leads us to conclude that we can well figure on one hundred and fifty, approximately our present quota, as the number of non-resident students for whom we should provide.

2. Five of our fraternities provide rooms in their fraternity houses in which undergraduates may live. This is regarded by the college administration as a privilege to be granted never to freshmen and to upper classmen only in the event of their attaining certain grades in their studies. Taking into account the plans of certain fraternities for the future as well as their existing accommodations, we can safely consider a hundred men as the approximate number of those for whom living quarters could be provided by the fraternities.

3. Our present dormitories, Jarvis, Seabury, and Northam Towers, will take 130 men.

To recapitulate, 150 men living at home, 100 in fraternities, and 130 in our present dormitories would mean a total of 380. Establishing 500 as our limit would therefore involve building rooms for 120 more. Naturally it would not be advisable to build new dormitories for this number at once. The new Cook dormitories will provide for about sixty men, and quarters for the remaining sixty can be built section by section.

If we maintain our present normal rate of increase in the numbers of our students, we should expect to reach 500 men in about five years — perhaps in less time. During those years, we can determine fairly well how near 500 comes to being the right number for Trinity.

As to the calibre of our students much might be said. Some of them come to us frankly because they are not able for one

reason or another to enter the college of their first choice. Part of these catch the contagious enthusiasm of those who chose Trinity first; others, apparently satisfied with having obtained some sort of a college connection, fall by the wayside; a few transfer to other institutions. It is significant to note that in the past year 26 students entered Trinity College by transfer after one or more years at other colleges: 13 asked for transfer papers to go elsewhere. This difference is still more significant when we call attention to the fact that those admitted to Trinity by transfer from elsewhere constitute only a small fraction of those who applied for admission by this method. It is our custom to require an impeccable record before we admit students from elsewhere. We also note that some of those thus admitted are among our most desirable students.

Before we go further with any discussion of incoming students, we should realize several phenomena characteristic of the sub-freshmen situation today. First, fathers no longer "send" their sons to college: they are called upon to pay the bill at the college the sons decide to attend. Second, the tradition of having a son enter automatically the college from which his father graduated is breaking down everywhere. Third, the choice of a college by a schoolboy is rarely reasoned, is often haphazard, and in many cases represents gregarious following of certain school heroes. Fourth, the competition among the colleges for boys who have shown promise, — intellectual, social, or athletic, — at secondary schools is becoming keener every year. (I refer those interested to "The Market for Freshmen", in the *Atlantic Monthly* for February 1930). Many colleges have developed organizations, usually on an alumni basis, which are most efficient in combing good schools for good boys. I am not referring here to any of the scandalous practices for inducing prominent schoolboy athletes to attend certain colleges which go far toward bringing college athletics into disrepute. I am simply raising the question as to whether any college, without an elaborate organization of its alumni, guided by college officers, can expect to get a fair share of good material, whatever may be its criterion for deciding what material it desires.

Let me stress the point here that of all the colleges with which Trinity can be considered as in direct competition, we are the only one with an urban location. Our great universities are naturally in large cities, but Trinity is the only small college in the East which is not located in a small town or in the country. Is this an asset or a liability? I am myself at times uncertain on just which side the balance dips, but I am sure that Trinity men are much more apt to lament, each to the other, over our lack of the social solidarity that is a natural result of a rural location than they are to bring out what it may mean to our students

to live in a city like Hartford. Do chances to hear good music (God bless Mrs. Hillyer and the Bushnell Memorial!) count for nothing with college students? Is the opportunity for social relations with groups of delightful people to be entirely ignored? Should not contacts with the life of a thriving and prosperous typical American city mean more for the development of a young man than the cloistered seclusion of a tiny town or the rural rock-ribbed hills of New England? I wonder.

I conclude this topic by noting that we are getting each year more and more of the men we want. In view of this I consider no drastic action to attract students necessary or advisable.

3. *The Faculty.* At the risk of seeming naively obvious, I should like to remind the Trustees that all the machinery of college is just a colossal device to bring on stated occasions groups of young men face to face with able and adequately trained teachers. By and large the strength of our college is determined by the strength of our teaching staff. Though the college was small ten years ago and though the plant seemed inadequate, the Trinity faculty then was a group of able men. It is so today.

Changes there have been of course. Only nine of the full professors remain who were here when I was elected your president and the faculty is half as large again as it was ten years ago. At that time I had the distinction of serving the college with two presidents emeriti and one former acting-president on our rolls — a cloud of witnesses large enough to daunt any man. And Professor Johnson still lives, only fifteen years younger than the college he has served so well.

It is worthy of note that we have proved at Trinity that a busy professor at a small college can find time to do valuable research and make permanent contributions to the literature of his subject. For some time I have been printing every year with my report a list of the publications or a summary of the research for which each member of our faculty may be considered responsible. It is a long list, and yet we must remember it represents the work of men selected not for their capacity for research or authorship but for their ability as teachers. The task of adding to the world's learning is but a by-product of our main task: we are an undergraduate college and our primary responsibility is to teach youth. A man who feels his chief task in life is research naturally gravitates to the large university, where he may find the elaborate apparatus necessary for his experiments or a schedule adapted to the long continuous hours he desires to spend on his private writing. It is greatly to the credit of the members of our faculty that they have been able to accomplish so much productive work while carrying regular teaching schedules.

The value of this work to the College is two-fold. First it

stimulates a professor's students when they realize in his classes that he is doing work in the front line and not simply in the service of supply; and second, it brings renown to us to have members of our faculty recognized among their confreres or in the outside world. Indeed we have built up some reputation for ourselves: two of our faculty have been awarded Guggenheim Fellowships of late, two more have received grants from the Council of Learned Societies for their translations, and two more are now conducting research that is financed in part by the National Research Council of the United States of America. Other recognition is obvious from the list of publications appended to this report.

Last year I made some comment to the Board of Trustees about what should be the normal load for a full professor. While some of our men are now burdened with too many class hours, it may be considered almost impossible to set up any standard in an endeavor to equalize the teaching load of our staff. One cannot evaluate the difference of time value between an hour spent in correcting papers and an hour devoted to setting up apparatus for a lecture demonstration. Some subjects demand an enormous amount of regular reading; others can be taught year after year without much change. Some men love to spend long hours outside the classroom with their students; others grudge every undergraduate interruption that keeps them from their research. And, aside from the practical impossibility of designating what should be officially the union load, a policy of such attempts at standardization might be unwise. There might arise, even among college professors, odd bits of jealousy, and one even might hear a professor complaining because his load was heavier than that of a comrade-at-arms! No, exact equalization of the professorial load cannot be our aim, though of course we should allow all opportunity for productive work, and not let any individual be crushed by too great a weight of teaching hours.

The problem of the salaries of our professors is, I know, rarely long absent from the thoughts of our Trustees. At this present time the teacher may well be envied by some of his friends, for he has a fixed salary, so protected that he is freed from the fear of reduction that haunts many a man today in the spheres of finance or manufacture. Though his dollars are not many, each one of them is bigger than it was a year ago, and may grow bigger yet. It is my feeling, however, that the time has come for an increase in our salary scale. Our present salaries are, as salaries go in the college world, respectable without being adequate, defensible though not generous. I should like to see some advance in our salaries now before we are forced into such action by competition with our neighbor colleges. The foundation of college harmony is a well-paid, contented faculty.

During this past year Professor John Spaulding was away on sabbatical leave for the entire year. In his stead we were fortunate to have Dr. Martin Beutler of Magdeburg, Germany, whose charm of manner and brilliancy of intellect won students and colleagues alike. We shall long treasure the fragrance of the memory of his stay with us. Professor Perkins, away for the year 1928-29, did not return to his classes until well along in the spring of 1930, and as Professor Dadourian was off on leave for the second half of last year, we were glad to have for one more year Mr. Goodnow, whose service for three years in Mathematics and Physics has been most helpful. For this coming year Professor Kriebel will take a long-delayed leave and Professor Skau will be in Europe continuing his studies as a Guggenheim scholar. This reduces greatly our Chemistry Department, but we have met the situation in fortunate fashion by the temporary appointment of one of our own graduates, Mr. Albert L. Peiker, and of a former graduate assistant here, Mr. Kenneth Buxton.

We are glad to welcome back to Trinity this year Professor Naylor, known and loved in Hartford far beyond the limits of our campus. His magnum opus, "The Influence of Vergil on Chateaubriand", is now in press and will bring renown to Trinity in this, the Vergil year.

It should be a source of satisfaction to all of us to realize that we have now in our curriculum at Trinity College courses in the Fine Arts. The large university offers a wide range of opportunity to its students along the lines of music, architecture, painting, and sculpture. Though the small college cannot duplicate such facilities, it should do something to insure that its graduates have a chance to acquire during their years of development some capacity for the appreciation of beauty as well as to develop such canons of taste as will make them able to distinguish what is ugly and untrue. Three years ago the authorities of the Morgan Memorial secured the services of A. Everett Austin, Jr., as Director of the Art Museum, and he came to Hartford with the distinct understanding that he was to have an opportunity to teach at Trinity. His courses have enriched our curriculum and added to the culture available for our students in the field of painting. This coming year we have taken another important step in establishing a Department of Music. The necessity of securing an organist for the new Chapel led us to find a man for that position who would also be able to give courses in music. Mr. A. Tillman Merritt comes to us with high recommendations from Professor Davison of the Music Department of Harvard. Not only will he be in charge of the music in the College Chapel, but he will also train the Glee Club and give certain courses in music available for all properly qualified students.

Mr. Charles J. Rohr, who has just completed his work for his Doctor's degree at Johns Hopkins University, takes the place this year of E. Wilder Spaulding, Assistant Professor for the last three years in the Department of History and Political Science. Mr. Rohr's training fits him to be an able assistant to Professor Humphrey.

At the last meeting of the Trustees I spoke at some length about our Extension Courses in Hartford. It has often been brought to our attention that there are a number of people in Hartford, many of them teachers, who are anxious to do work of college grade, perhaps to obtain a college degree. We have done something to meet this problem, but only in a small way. It has been my feeling for some time that we should organize our Extension work on a more ambitious basis, paying special attention to the needs of Hartford school-teachers.

This fall the Executive Committee of the Trustees has appointed as Director of Extension Courses Mr. Irwin A. Buell of the Hartford Public High School. Twice in the last few years Mr. Buell has taught classes at Trinity in emergencies and is known and respected by all of us. His present position at the Hartford Public High School puts him in close touch with all the teachers of Hartford and his training at Yale in the field of Education qualifies him well to take full charge of our Extension work. As these classes come in the late afternoon and evening, he can do it without interfering with his services at the High School. The first result of the application of his experience and intelligence to the organization of our Extension classes has been a large increase in the number of students, insuring that the work can carry itself financially without any call upon the college budget.

It is quite possible that we have only begun to realize the potentialities of the service we can render along these lines to our city of Hartford. If this is so, we must take cognizance of it in making plans for the increase of our teaching staff. With the growth of our undergraduate body, we shall need more instructors and we may be able to add to our staff men who can help in certain departments at the college and give time afternoons and evenings to teaching in Extension. It is not always fair to ask our regular professors and teachers to add to their load by teaching an Extension class even though thereby they add to their stipend. It would be quite possible, on the other hand, to engage men with the needs of our Extension Courses in mind. For example, Professor Kleene needs assistance in the Department of Economics. While we may not be able at this time to give him the equivalent of a man's full time, we could, however, secure someone who could devote half his time

to the Department of Economics on the campus and the rest to teaching in the evening, the financial burden being carried in part by our regular budget and in part by the receipts of Extension classes.

No discussion of the Faculty of Trinity College today should close without mentioning the name of Dean Hood. Tireless, astute, loyal, he has done much to add to our numbers students of the right type and to keep in good college standing those admitted. He is a good Dean, — some day he may be considered a great Dean.

4. *Our Finances.* It seems a far cry back to the mediaeval darkness of ten years ago when the Trustees were supposed as part of their duties to make up deficits. The difference between 1920 and 1930 is not relative but absolute. Ten years ago the total annual expenses of conducting the College were \$133,141.79, — and we did not have it. This year our budget figure is \$252,-518.00 — and we have it! There is a remarkable difference between plus and minus signs, between red ink and black.

This happy transformation has been brought about not only by strengthening the resources of the College by increased endowment but also by a noteworthy growth in student fees. Ten years ago the annual contribution of our undergraduates toward the cost of their education was \$23,000, collected during the course of the year with great difficulty. This fall before college opened more than twice that amount was paid in student fees for the first half year. This increase, of obviously over 300%, is due partly to more students, partly to effective collection, and partly to increased fees. On this last item we are still somewhat behind other colleges of our group. Our present charges are \$350 a year, which includes tuition and all fees: I recommend that the Trustees give notice now in the College Catalogue that it is our intention in the near future to raise our figure from \$350 to \$400.

As to our endowment, ten years ago the book value of our trust funds was \$1,418,684.56; on July 1st of this year the figure was \$3,109,037.35, which means of course that we have more than doubled our endowment in that time. I am not considering the market value of our securities, only their book value, — partly because recent fluctuations in the stock market have warned us against the futile pleasure that we have enjoyed of noting how much the market value of our securities is above the value at which they are carried on our books, and partly also because the market value of our stocks has no real meaning for us as we do not intend to sell them. In the case of some of our holdings a high market value may be interpreted as an indication of expected stock dividends and opportunities for the

purchase of rights; but for a consideration of the stability of the finances of the college, it is enough to point out that none of our securities are in default and that our interest yield on our Consolidated Account, well over 5%, is steadily increasing every year. Just how that happy situation is going to be affected by financial depression will be apparent in the next few months. The general nature of our holdings is not such as to give us any cause for alarm yet.

At the time of my coming to Trinity, the gratitude of the College was due to Professor McCook, whose zeal in raising endowment at a critical time saved the College from insolvency and to the individual Trustees who were underwriting the increase of salaries from \$2500 to \$3500, recently voted by the Board. We should now pay full tribute to the alumni who gave liberally to the Centennial Fund, to the generosity of certain people in Hartford, to the General Education Board for their timely aid, and to the memory of individuals who have remembered the College in their wills, particularly the late George Hoadley, whose bequest assured the success of the Centennial Fund. So far he is our greatest single benefactor.

I should like at this time to place on record my estimate of the high worth of the service rendered to Trinity College at a critical time by one of her loyal sons, the late Walter Schutz of the Class of 1894. I have before me the letter to the Board of Trustees with which he submitted his report as Assistant Treasurer of the College for the year ending July 31, 1903. Together with the late William E. Curtis, '75 he had set up a new system of bookkeeping for the College to replace the haphazard method previously in effect, a system which with a few minor changes has proved adequate for our present growth. In other words, it should be a matter of general knowledge that Walter Schutz laid the foundation of our present financial stability. In addition he rescued certain trust funds that were in grave danger of disappearing from sight in the general confusion in which he found our accounts. His successor in office, Mr. Waterman, guarded our trust funds with scrupulous care, and during his term of service the College moved forward gradually to our present situation. Our new treasurer, Mr. Motten, has already shown such energy in his care for our plant and such a grasp of our financial affairs as to give us real satisfaction. With Major Wilcox and Mr. Woodward on our finance committee, we may well feel that the funds of the college are in safe hands.

Now for the future. It is my conviction that Trinity College is making a contribution of real worth to the cause of education in this country, and in the next ten years we want to see the College amply equipped for that contribution. In the natural

course of things we should have an enrolment of 500 undergraduates in about five years: let us determine now that this should be our limit. It would seem to be our metier to prepare men for the learned professions, and accordingly we can expect to see the greater part of our men going on to graduate schools. To some extent that will control the content of our curriculum, since we must, in order to carry out our intention of providing the best pre-professional preparation in the country, give such courses as the professional schools require. With those conditions met, it should be our task to provide a liberal education for all, for those who go on to the universities for graduate work as well as for those whose formal education will close with graduation from Trinity. Keeping true to our best traditions, we shall continue to uphold the cultural values of the studies that have long justified themselves as of permanent worth. We should keep in the forefront of the college world as far as modern methods of instruction and administration are concerned, but we should be very slow to allow entrance into our curriculum of those studies which, devoid of real difficulty, are so attractive to the languid youth of today.

As Trinity College is the only institution of college grade in the limits of the City of Hartford, we must always be awake to the necessity of providing college training for a limited number of local boys. Beyond that we should further the cause of education in this city still more by offering a worthy program of courses in extension, for men and women, paying particular attention to these who are eager to complete the requirements for a college degree. We can do real service here.

I should like to make clear to the Trustees of Trinity College my sense of privilege in having charge of the religious life of our college. It was that opportunity that brought me here ten years ago, and the urge still remains, increasing year by year. I am not thinking so much of the oversight of formal services as I am of fostering the spiritual development of a group of college men. With our new Chapel to provide the setting and with our century-old tradition of relation to the Episcopal Church, we are in a position to show the college world that it is possible for undergraduates to maintain real religious life side by side with a fearless devotion to truth.

In the course of the next decade we must strengthen our faculty still further. The opportunities here are such as to attract good teachers: we must make provision for progressive increases in our salary scale. In the last ten years we have doubled our endowment: we must double it again in the ten years that are to come. With that reinforcement, and with our present plans for the development of our campus well carried

out, my vision of the Trinity College of 1940 is an attractive one, with a compelling power which I should like to share with my fellow Trustees.

I append as usual a list of the research projects and the publications of our faculty for the past year.

F. C. Babbitt, Professor of Greek

Volume III of the translation of Plutarch's *Moralia* now in press.

A. R. Bangs, Assistant Professor of German

"I have made considerable progress in getting my thesis ready for publication. In addition I have submitted to a magazine for publication an article dealing with Bulwer-Lytton and his borrowings from Goethe's 'Faust'."

L. C. Barret, Professor of Latin

- (1) The Kashmirian Atharva Veda, Book Fifteen, *Journal of the American Oriental Society*, 50, 43-73.
- (2) Review of Hillebrandt's *Vedische Mythologie*, 2te Auflage. *Journal of the American Oriental Society*, 50, 74.
- (3) Two Pārppalāda Manuscripts, *Journal of the American Oriental Society*, 50, 104-111.

T. H. Bissonnette, Professor of Biology

Publications from the Biology Department, 1930, papers in press, papers in preparation, and research in progress.

- * (1) Bissonnette, T. H., 1930. Studies on the Sexual Cycle in Birds. I. Sexual Maturity, its Modification and Possible Control in the European Starling (*Sturnus vulgaris*). *American Journal of Anatomy*, 45, 289-305.
- * (2) Bissonnette, T. H., and M. H. Chapnick, 1930. Studies on the Sexual Cycle in Birds. II. The Normal Progressive Changes in the Testis from November to May in the European Starling (*Sturnus vulgaris*), an Introduced, Non-migratory bird. *American Journal of Anatomy*, 45, 307-343.
- (3) Bissonnette, T. H., 1930. A Method for Securing Marine Invertebrates. *Science*, 71, 464-5.

In Press.

- * (1) Bissonnette, T. H., 1930. Studies on the Sexual Cycle in Birds. III. Normal Regressive Changes in the

Testis of the European Starling (*Sturnus vulgaris*), from May to November. *American Journal of Anatomy*, 46, November 15th.

- *(2) Bissonnette, T. H. Studies on the Sexual Cycle in Birds. IV. Experimental Modification of the Sexual Cycle in Males of the European Starling (*Sturnus vulgaris*), by changes in the Daily Period of Illumination and of Muscular Work. *Journal of Experimental Zoology* — Date and page, volume, and number not set.

In Preparation.

- *(1) Bissonnette, T. H. Studies on the Sexual Cycle in Birds. V. Effects of Light of Different Intensities upon the Testis Activity of the European Starling (*Sturnus vulgaris*).
- *(2) Bissonnette, T. H. Studies on the Sexual Cycle in Birds. VI. The Effects of White, Green, and Red Lights of Equal Luminous Intensity on the Testis Activity of the European Starling (*Sturnus vulgaris*).
- *(3) Report on No. 1 above is for presentation at the annual meeting of The American Society of Zoologists at Cleveland, Christmas week.
- *(4) Report on No. 2 above is for presentation at some meetings.
- (5) Notes on the Biology of *Bugula Gracilis*, variety *Uncinata*, its Metomorphosis and Phototropism.

Research in progress.

- *I. Further investigations on the Sexual Cycle in the European Starling in relation to Light.

"I beg leave also to report that during the past summer I directed Research at the Marine Biological Laboratory at Woods Hole, Mass., in connection with the Marine Invertebrate course. Of the six students working under my Direction two were successful in winning two out of the three Collecting Net Scholarships valued at \$75.00 each for research table next year at the Laboratory. One of these students is taking his problem with him to the University of Chicago as the subject of his Ph.D. thesis, with the consent and approval of the Zoology Department there. The other student is still an undergraduate and will probably continue the sort of work he began with me. Of the other four students working on problems under my direction, one goes to Syracuse University as assistant to the Zoology Depart-

ment head, one is a graduate student at Harvard in Oceanography, one is a graduate student at University of Pennsylvania studying regeneration, and the other is a graduate student at Johns Hopkins in Physiological Effects of Endocrines.

In the above list of publications and Research in progress, those items marked with a (*) are aided by a grant from the Committee on Research in Problems of Sex of the National Research Council of the United States."

T. L. Hood, Dean

"I am working on a volume of Letters from Robert Browning collected by Thomas J. Wise."

R. B. W. Hutt, Assistant Professor of Philosophy

"I am attempting to make a contribution to the Psychology of Sex based upon data drawn from pornography dating from Paleolithic times to the present day and as found in the various social strata. The result has been a compilation in excess of two hundred thousand words to date and the end of the research is not in sight. The temporary title is, 'Sex Interests and Taboo'. It is improbable that this tome shall ever be published unless it be privately and the prints restricted to distribution amongst competent scholars. The nature of the data precludes ordinary publication and distribution."

G. A. Kleene, Professor of Economics

"I have written a sketch of John James McCook for the *Dictionary of American Biography* and some book reviews for the *American Economic Review*. Other things are not ready for publication."

V. K. Kriebel, Scoville Professor of Chemistry

Mr. Blanchard and Professor Kriebel continued their work on the hydrolysis of nitriles. A further study of this hydrolysis is being carried on by Professor Kriebel at Cambridge this year.

L. H. Naylor, Assistant Professor of Romance Languages

Chateaubriand and Vergil, *The Johns Hopkins Studies in Romance Literatures and Languages* No. XVIII, The Johns Hopkins Press, 1930, 213 pages, due to appear about October 20.

Old French "amenestraison" article in *Modern Language Notes*, March, 1930.

Old French "musgue" soon to appear in *Modern Philology*, University of Chicago Press.

H. A. Perkins, Jarvis Professor of Physics

"I am working on a text book of General Physics and hope to be able to have it ready for publication sometime during 1931."

C. J. Rohr, Instructor in History

I have in preparation one matter of research which is, at the present time, almost to completion. The title of the work is: THE GOVERNOR OF MARYLAND. A Constitutional Study of the Historical Development and Present Powers of the Office.

Odell Shepard, James J. Goodwin Professor of English Literature

The Lore of the Unicorn, published this year in America.

Thy Rod and Thy Creel, about 70 essays, published in newspapers and magazines.

Articles on Robert Bridges and John Masefield, published in *The Bookman*.

E. L. Skau, Assistant Professor of Chemistry

Mr. Meier and Professor Skau continued Professor Skau's original work on the purification of organic compounds and the determination of some of their physical constants.

S. B. Smith, Assistant Professor of Chemistry

"I am working at present on a three component solubility system which I hope to complete this year."

J. A. Spaulding, Professor of Germanic Languages

The Warfare of a Nation (*Die Deutsche Erhebung von 1914*) by Friedrich Meinecke, University of Berlin, translated into English, Davis Press, Worcester, Mass., 1915.

E. L. Troxell, Professor of Geology

"Research has been carried on with the fossils collected in 1929. Two papers were presented at the national meetings, Christmas, at Washington.

Articles and abstracts on: Extinct animals, Fossil hunting, Species names, etc., have been published in *Science*, *Pan-American Geology*, *Bulletin of the Geological Society of America*.

With the aid of a grant from the National Research Council, the work of restoring the skeleton of the giant bird *Diatryma* was continued; only one other such skeleton is known. In a manuscript, now completed, attention is

first called to the fact that *Diatryma* is related to *Ardea herodias*, the Heron.

Three new cases of museum exhibits have been completed and are on display; others are in preparation."

A. P. R. Wadlund, Assistant Professor of Physics

"During the academic year 1929-30, the only research carried on by me has been in conjunction with a graduate student on "The Application of the Photo-electric Cell to Commercial Counting. Work is still in progress on the setting up of apparatus for research work in X-rays."

REPORT OF THE DEAN TO THE PRESIDENT OF TRINITY COLLEGE

Though statistics "prove nothing," the Dean begs indulgence in dealing with certain customary quantities in this Report for 1929-30 before setting down somewhat informally certain impressions dependent more on feelings than on figures.

The total enrolment in the College was 312, with 296 undergraduates, an increase over 1928-29 of 36 (13%) in total enrolment and of 30 (11.2%) in the number of undergraduates, at a time when enrolments in general in the United States were not increasing. The total number of dismissals for failure in studies was 16, as against 12 in the preceding year. The average figure for the four-year period from 1924 to 1928 was 25. In general, therefore, a definite diminution in the amount of scholastic failure is apparent during the last two years, despite the increase in total enrolments. A unique circumstance in 1929-30 was that at the close of the Christmas Term no student above the grade of Freshman was dismissed for academic failure.

Beyond this point statistics either grow too detailed to be interesting or too complicated by circumstances to be definitely informative. For example, the physical welfare of the students has been so remarkable both absolutely and relatively to general conditions that details would be trivial. Absences on account of illness were few and in no instance caused dismissal on account of failure in studies. Dr. Swan attributes these results to good fortune; but such good fortune is possible only under favorable conditions and only when the Medical Officer exercises the utmost vigilance and skill, as Dr. Swan has done. The quality of his service is least likely to be realized at such a time, when its results are most gratifying.

Again, the figures on absences from classes are of little service. Such statistics as are available would indicate at first glance that the new system of rules regarding attendance, introduced at the beginning of the year, had increased the number of unexcused absences. But such an inference would be unjust to a very satisfactory method of eliminating the more serious aspects of the problem of overcutting. The fact is that attendance was far more faithfully reported by the Faculty than in 1928-29. This circumstance alone accounts for the apparent increase in unexcused absences; when there was actually a decrease. Further, the number of individuals guilty of flagrant overcutting was greatly reduced; absences were more promptly noticed and accounted for than under the former system; and

classes were well attended and successfully conducted in the last ten days before examination periods, as they were not in the previous year. In general, the students found the system satisfactory in that it was, as intended, at once more liberal on the average and less a temptation to gross overcutting in the past of a few misguided individuals. According to the testimony of instructors, attendance was sufficiently regular to indicate that the new regulations have solved what was formerly a serious problem.

The staunch interest of alumni has had telling effects, not the least important of these effects being the certain promise of further progress. The feeling of contentment while hard at work has penetrated more deeply into the undergraduate consciousness. The Dean believes that he shares with the authorities the feeling that the year has seen conspicuous advances in our general well-being and in the smoothness of our procedure toward ends desired.

T. L. HOOD,

Dean.

Note: As this report goes to press the enrolment of students at Trinity College for the academic year 1930-31 seems to be 351.

Trinity College

Report

of

The Librarian

October, 1930

LIBRARIAN'S REPORT.

Trinity College,

Hartford, Connecticut.

To the Trustees of Trinity College:

In accordance with Section Three of Article Fifteen of the Statutes of the College, I submit herewith the report of the Librarian for the year ending June 30, 1930, the fifteenth it has been my privilege to offer.

As in other years, the Library has been kept open fifty-four hours per week, and the usual statistics in regard to attendance are given:

ATTENDANCE CLASSIFIED

	Day	Evening	Faculty	Visitors	Total
1929-30					
September	371	70	61	5	507
October	1374	418	137	14	1943
November	1152	377	121	22	1472
December	927	238	64	14	943
January	860	233	140	29	1222
February	914	148	95	20	1177
March	1069	225	140	19	1403
April	589	106	54	11	760
May	1081	264	86	41	1272
June	345	89	47	5	486
Totals	8,682	2,168	945	180	11,975

ATTENDANCE MONTHLY (1)

	September	October	November	December	January
1926-27	279	1739	1501	1271	1327
1927-28	338	1486	1549	1119	1209
1928-29	393	1664	1669	1113	1196
1929-30	507	1943	1472	943	1222

ATTENDANCE MONTHLY (2)

	February	March	April	May	June
1926-27	1153	1611	922	1433	298
1927-28	1036	1436	811	1326	392
1928-29	1266	1429	1090	1477	228
1929-30	1177	1403	760	1272	486

ATTENDANCE ANNUAL SUMMARY

Year	1925-26	1926-27	1927-28	1928-29	1929-30
	12,277	11,682	10,536	11,525	11,975

These figures are about what we should expect. Indeed no great change need be expected so long as the number of students and methods of teaching remain substantially as they are.

INCREASE OF THE LIBRARY

During the year, there have been added to the Library 3155 volumes and 6323 pamphlets. Of these 768 volumes were purchased. All the pamphlets and 2387 volumes were presented. Included in the purchases are 132 volumes of unbound periodicals and 32 volumes paid for by the Departments of Chemistry, Civil Engineering, German, Philosophy, and Romance Languages. Of the volumes added to the Library, 1799 are bound and 1224 unbound. It should be added that most of the volumes of unbound periodicals and some of the other volumes will be bound during the summer.

The increasing cost of books and periodicals makes it more and more difficult to meet the needs of faculty and students. Additional funds are much needed, especially, perhaps, for the securing of books and periodicals sorely needed by the Science Departments.

Without the generous appropriation from the Morgan Fund, it would be impossible to secure even the books essential to the work of instruction.

Among the more important purchases of the year may be mentioned:

British Documents on the Origins of the War, 1896-1914; Documents Diplomatiques Français, 2 vols; H. W. Wilson, War Guilt; Miller, Drafting of the Covenant, 2 vols; Soldiers of the Great War, Haulsee, 3 vols; Feldmarshal Conrad's "Aus Meiner Dienstzeit, 5 vols; Diary of Lord Bertie, ed. Lady Algernon Lennox, 2 vols; American Secretaries of State and their Diplomacy, 10 vols; Munro, Municipal Government and Administration, 2 vols; Gorham, Life of Edwin M. Stanton; T. C. Smith, Life and Letters of James Abram Garfield; Victor S. Clark, History of Manufactures in the United States, 3 vols; Recent Economic Changes in the United States, 2 vols; Lancaster, History of French Dramatic Literature, 2 vols; Sainte-Beuve, Les Grands Ecrivains Français, 10 vols; J. J. Rousseau, Correspondence General; Leconte de Lisle, Oeuvres, 4 vols; Alfred de Musset, 8 vols; Curtius, Die Wandmaleri Pompeijis; Frazer's, Fasti of Ovid, 5 vols; Nilsson, Minoan-Mycenæan Religion; Nietzsche, Works, 8 vols; Picard, L'Acropole, 3 vols; Liverpool Marine Biology Committee Memoirs, 29 vols; Dictionary of American Biography; Larousse du XX^e Siecle; Handbuch der Experimentalphysik; Beilstein, Handbuch der organischen

Chemie; Encyclopaedia of the Social Sciences; and Liebigs Annalen der Chemie, 460 volumes.

The last item is the largest single purchase we have been able to make for years. We were enabled to make it largely through the accumulated income of the Riggs Fund, supplemented from other sources. It is one of the most important and most expensive chemical periodicals, and we are fortunate to secure a complete set in the original edition. It is the kind of purchase we should be making constantly in order to develop the Library to meet present conditions in chemical research and in teaching. However, our lack of money makes such purchases so infrequent that when we can make one, it is an event in the history of the Library and calls for special mention.

GIFTS

Appendix II gives the names of donors of the year; to these should be added the names of donors of current periodicals given in Appendix I. We are again indebted to Dr. Isbon T. Beckwith, to Charles G. Woodward, '98, President Ogilby, Judge Joseph Buffington, '75, and to Professors Adams, Babbitt, Barret, Bissonnette, Costello, Galpin, Kleene, Swan, and Mr. Paden for their constant thought of the Library. Judge Joseph Buffington gave us some 270 useful volumes, a large addition to his many earlier gifts. The Academy of Natural Sciences in Philadelphia gave us 221 unbound volumes of their publications, a valuable gift. Columbia University gave us Professor Schneider's four volume work on "Samuel Johnson, President of King's College, His Career and Writings"; this is of especial interest to us here because of Dr. Johnson's eminence in the early history of the Episcopal Church in Connecticut, and because of our Professor Charles Frederick Johnson's descent from him. Mrs. Ansel G. Cook added 137 volumes to her already large gifts of books to the Library. Mrs. Henry Ferguson has, as for many years, given us books, periodicals, and interesting pamphlets. Burton Mansfield, D. C. L., 1924, gave us the magnificent work in two volumes on the Great Chalice of Antioch, beautifully illustrated with photogravures and etchings. The Phoenix Mutual Life Insurance Company gave us 106 volumes dealing with Insurance, chiefly Reports of the Insurance Departments of the several States, and the Travelers Insurance Company gave us twenty similar volumes. Professor Waldo Selden Pratt, of the Hartford Theological Seminary, gave us some twenty volumes, dealing chiefly with Classical architecture. The Board of Publication of the Schwenkfelder Church gave us a copy of the monumental work on the genealogy of Schwenkfelder families. Mrs. Reginald V. Wilcox gave us some forty pamphlets, programmes, pictures, etc., relating to the Class of 1899. Ernest

Henry Wilson, Sc. D., 1930, gave us a set, seven volumes, of his beautifully printed and illustrated works on gardens and trees. They are a much appreciated addition to our slender stock of works of this kind. The Yale University Press gave us forty-nine volumes of the publications of the Press in the field of Political Science in honor of the late President William Howard Taft and the late President Arthur Twining Hadley. The generosity of the Yale Press is very greatly appreciated. Though no one gift of the year, perhaps, is as important as some others received in other recent years, on the whole the gifts of the year in number and value compare very favorably with the average. We acknowledge again with gratitude the gifts of their publications by the Carnegie Endowment for International Peace, the Carnegie Foundation for the Advancement of Teaching, the Carnegie Institution of Washington, the Smithsonian Institution, the Commonwealth Fund, the State of Connecticut, and the Government of the United States. We are indebted again to the Connecticut State Board of Education for eight bound volumes of Town reports.

CATALOGUING

The work of the year has been largely the cataloguing of recent accessions, though reclassifying and recataloguing has taken considerable attention. 1635 volumes not before catalogued have been catalogued and shelved. 811 volumes have been recatalogued, and 1182 volumes have been reclassified.

The work of the year may be thus summarized:

Books catalogued	1635
Pamphlets catalogued	802
Books recatalogued	811
Books reclassified	1182

Total of items handled	4,430
------------------------	-------

Reviewing the work of the last fourteen and one half years, we have the following figures:

Number of books catalogued	41,895
Number of pamphlets catalogued	3,522
Number of books recatalogued	30,426
Number of pamphlets recatalogued	1,084
Number of books reclassified	32,005
Number of pamphlets reclassified	1,081

Total of items handled	110,013
------------------------	---------

New cards added to catalogue	128,632
Total number of old cards altered	28,073

BINDING

As usual, the greater part of the appropriation for binding has been spent in binding current periodicals, including a part of the set of Liebig's Annalen, a large number of the volumes of the Publication of the Philadelphia Academy of Natural Sciences, and a considerable number of other volumes purchased to fill gaps in our sets. We are slowly catching up in this very important work, and it is requested that the appropriation be continued.

FUNDS

Again attention must be called to the great need of new Library Funds. A minimum of \$100,000 additional is needed to enable us to maintain our relative rank among New England college libraries; probably \$200,000 is nearer the mark. With the aid of the appropriation from the Morgan Fund, the continuation, and, if possible, the increase of which is requested, we are able to purchase the books and periodicals most insistently demanded in the work of teaching, though because of increased costs even that is hardly possible. We are unable to subscribe for many much needed periodicals, much less can we buy complete files of them. Complete files are becoming scarce and prices are going up. This is especially true of scientific periodicals, for which the demand is keenest. Until more money is available, we must continue to live from hand to mouth, and no systematic plan for building up our collection in any field is possible. We must continue to hope that this great need will be met at no very distant day.

STAFF

Miss Louise M. Bailey, as cataloguer, and Mrs. Harold Schatz, as assistant, have given faithful and efficient service.

The Student Assistants have been: Joseph Delphis Gauthier, '30; Casimir Leon Stanley Sutula, '30; George Lawrence Blauvelt, '31; Robert Otto Muller, '31; Gregory Jerome Wyckoff, '31; George Keith Funston, '32; Herbert George Norman, '32; and Arthur Clarence Carlson, '33. They are to be commended for their faithful service.

THE LIBRARY COMMITTEE

The resident members of the Library Committee, President Ogilby and Professor Costello, have as always been most in-

terested and most helpful. It is unfortunate that it is so seldom possible for the whole Committee to meet, for such meetings have always been valuable and productive of helpful suggestions.

CONCLUSION

The year has, for the most part, been one of routine work. Nevertheless, real progress is being slowly made. Our great need is new Funds to enable us to plan systematically for the development of our Library. Until this need is met in large degree, each successive annual report will be similar to the last. May we not expect that the Library will share fully in the growth and prosperity of the College?

All of which is respectfully submitted.

ARTHUR ADAMS,

July 3, 1930.

Librarian.

APPENDIX I.

Periodicals Received, 1929-1930.

Note: The following figures explain the sources whence the Journals are derived:

- * Purchased with the income from the book funds.
- ** Gift of the publisher.
- 1 Gift of William Gregg Brill, '23.
- 2 Gift of Charles Guilford Woodward, '98.
- 3 Gift of E. F. Waterman, '98.
- 4 Gift of Mrs. Henry Ferguson.
- 5 Gift of John Ridgely Carter, '83.
- 6 Gift of Professor Thomas Hume Bissonnette.
- 7 Gift of President R. B. Ogilby.
- 8 Gift of Modern Language Department.
- 9 Gift of Richardson Wright, '10.
- 10 Gift of John Hall Sage.
- 11 Gift of the State of New York.
- 12 Gift of the United States Government.
- 13 Gift of Professor L. C. Barret.
- 14 Gift of Department of Economics.
- 15 Gift of Professor H. A. Perkins.
- 18 Gift of Professor Arthur Adams.
- 19 Gift of Professor F. C. Babbitt.
- 20 Gift of the late Rev. Dr. Samuel Hart, '66.
- 21 Gift of the Romance Department.
- 22 Gift of the late Professor R. B. Riggs.
- 23 Gift of the Department of Biology.
- 25 Gift of the Rev. W. F. Parsons.
- 26 Gift of Professor G. A. Kleene.
- 29 Gift of Professor E. F. Humphrey.
- 30 Gift of Professor I. T. Beckwith.
- 31 Gift of Charles Lathrop Pack, LL.D.
- 32 Gift of John B. Shearer, '09.
- 33 Gift of the Faculty Club.
- 34 Gift of Dr. William Hubbard, '88.
- 35 Gift of Carnegie Endowment for International Peace.
- 36 Gift of William D. Paden.
- 37 Gift of Newton C. Brainard.

Trustees of Trinity College
Hartford, Connecticut

REPORT OF THE TREASURER
July 1, 1930

REPORT.

To the Trustees of Trinity College:

The Treasurer makes the following report for the fiscal year ending June 30, 1930, taking the figures largely from the annual report of the auditor. In submitting this report it may be noted here that the income for the present fiscal year in some cases is not so large as it was for the fiscal year ending June 30, 1929. In previous years it has been the custom to include all interest on bonds falling due July 1 in the income for the fiscal year closing June 30. This practice was discontinued during the past year when the trust funds were turned over to the Hartford National Bank & Trust Company as Trust Officer, and the interest on these bonds is now credited to the fiscal year beginning July 1. Had these funds been included the excess revenue for the present fiscal year would have been \$19,963.45. These revised figures give a basis of comparison with last year but a comparable basis, as stated elsewhere, will be re-established at the close of the coming fiscal year.

Forms of bequest have been appended on page 60 for any who may be disposed to remember Trinity College by will.

ROGER H. MOTTEN,
Treasurer.

July 1st, 1930.

CERTIFICATE OF AUDITORS

Mr. Frank L. Wilcox, Chairman Auditing Committee,
Trinity College,
Hartford, Conn.

Dear Sir:

We have audited the accounts and records of TRINITY COLLEGE for the fiscal year ended June 30, 1930, and submit herewith our report, which consists of the following exhibits and schedules, together with our comments thereon:

EXHIBIT "A" — Comparative Balance Sheet, June 30, 1930 and 1929.

"B" — Summary Statement of Income for the Fiscal Year and its Application.

"C" — Statement of Income from Investments and its Application.

"D" — Statement of Income Applicable to General Expenses and its Disposition.

SCHEDULE "1" — Government, Railroad, Public Utility, and Other Bonds.

"2" — Bank, Railroad, Public Utility, and Other Corporation Stocks.

"3" — Mortgage and Farm Loans.

"4" — Land, Buildings, and Equipment.

"5" — Trust Funds.

"6" — Funds Reserved for Designated Purposes.

"7" — Academic Fund Investments.

"8" — Gifts and Bequests Received.

Very truly yours,

MILLER, FRANKLIN AND COMPANY, Inc.

By Robert Atkins.

Certified Public Accountant, New York

New York, N.Y.
August 25, 1930.

Comparative Balance Sheet at the close of

**Summary Statement of Income and its Application
for the Fiscal Year ended June 30, 1930**

Income:

From Investments:

Interest	\$93,083.28
Dividends	70,994.96

\$164,078.24

From Sources Applicable to General Expense:

Students' Fees, etc.	\$95,896.94
Sundry Income	3,980.09

99,877.03

Extension Courses	\$3,929.49
-----------------------------	------------

Profit on Sales of Securities (Net)	1,719.40
---	----------

5,648.89

Gifts:

For Salaries and Salary Suspense Account	\$7,543.94
Miscellaneous Purposes	5,025.00

12,568.94

Total Income	<u>\$282,173.10</u>
------------------------	---------------------

Applied as Follows:

Salaries:

From Investments	\$71,202.34
From Sources Applicable to General Expense (Deducted below)	67,562.24
From Gifts	5,893.94
Salary Suspense Account	1,500.00

\$146,158.52

General Expenses — Exhibit "D"	\$147,096.00
--	--------------

Less: Salaries included therein	67,562.24
---	-----------

\$79,553.76

Scholarships	16,449.50
------------------------	-----------

Cook Fund Principal	9,882.91
-------------------------------	----------

Repairs Main Building	5,000.00
---------------------------------	----------

Consolidated Investment Principal	3,048.35
---	----------

Extension Courses	4,183.93

ALUMNI PRIZES IN ENGLISH COMPOSITION FUND:

Gifts from various Alumni and friends of the College between the years 1890 and 1902 were made to Dr. Charles Frederick Johnson, Professor of English Literature, for the purpose of establishing a fund the income of which should be devoted to prizes in the English Department.

In 1902, Prof. Johnson placed the principal of the fund in the hands of the Treasurer of the College, the same to be preserved as a separate fund for the endowment of prizes in the English Department.

FERGUSON PRIZE FUND:

Gift of Rev. Henry Ferguson, LL.D., of the Class of 1868, of \$1,000 to endow a Prize Fund in the Department of History and Political Science upon the following conditions: "1. The principal of the Fund is to be kept securely and separately invested. 2. The income of the Fund shall be used for a prize or prizes in the Department of History and Political Science; and if more than one prize is given, the first prize shall be three-fifths (3-5) of the income and the second prize two-fifths (2-5). 3. If in any year the prize or prizes be not assigned, or if there shall be any excess of income above the amount paid in prizes, such excess or such income shall be added to the principal of the Fund. 4. In case the Fund should be diminished by depreciation of the securities in which it is invested, or from any other cause, so as to be worth less than One Thousand Dollars, the prizes shall be omitted, and the income shall be added to the principal until it be brought up to the full amount of One Thousand Dollars." Gift accepted by Trustees June 24, 1890.

THE ELBERT H. GARY SCHOLARSHIP FUND:

Elbert H. Gary of New York City was the head of a large business corporation, and in all his dealings stood for integrity and the highest business standards. In his will (he died in 1927) he made the following provision:

"I give and bequeath unto — Trinity College — the sum of Fifty Thousand Dollars (\$50,000) — in trust, — said sum with its accretions shall perpetually be called and known as the Elbert H. Gary Scholarship Fund. — The net income of such fund shall from time to time be used toward the payment of the regular tuition fees of students, — to be selected from time to time by the vote of a majority of the Board of Trustees of the legatee. — It is my desire that in making such selections the Board in its discretion will choose persons who are least pecuniarily able to pay their tuition, and who are morally, mentally and physically worthy and competent. If at any time the total net income from such fund is not necessarily used for such tuitions, then the surplus may be used by said Board of Trustees for such other college expenses as a majority of the Board may determine. The principal shall always be kept and maintained intact and undiminished."

Principal.

ISAAC H. TUTTLE SCHOLARSHIP FUND:

Rev. Isaac Henry Tuttle, S.T.D., of New York City, a graduate of the class of 1836 (who died in 1896), provided in his will that, if sufficient balance remained after the settlement of his estate and certain specific bequests, "then I give and bequeath to Trinity College of Hartford, Connecticut, the sum of \$5,000, to be applied in aiding young men in their preparation for Holy Orders." The estate was insufficient to pay the full amount of this legacy, and the amount received from the executors was \$1,284.30.

TUTTLE PRIZE FUND:

Miles A. Tuttle of Hartford (who died in 1858), bequeathed \$500 to Trinity College to be expended as Dr. Gurdon W. Russell should direct. Dr. Russell, the brother-in-law of Mr. Tuttle, directed that this money be used to establish a prize fund; the prize to be awarded to that member of the Senior class who shall write the best essay on a given subject.

FRANK W. WHITLOCK PRIZE FUND:

Mrs. Lucy C. Whitlock of Great Barrington, Mass. (who died in 1892), bequeathed to Trinity College "for and in the name of my son, Frank W. Whitlock, \$1,000, and I request that the same shall be used for such purposes and at such times and in such manner as my said son shall designate in writing." On June 23, 1896, the Trustees adopted a scheme of prizes in the Department of English pursuant to an agreement with said Frank W. Whitlock, a graduate of the Class of 1870, which provides that "the principal of the fund shall be invested and the income thereof annually appropriated to the payment of the prizes.

CONSOLIDATED INVESTMENT FUND:

In June 1924 the Board of Trustees voted, upon recommendation of the Executive Committee, to consolidate the securities of all Trust Funds, where possible by terms of the gift, into a consolidated investment fund. Wherever the terms of the bequest or gift have designated separate investment that request has been strictly observed. The individuality and integrity of each Trust Fund has been kept separate and the income and expenditures of each are separately recorded as shown by the preceding

pages. The advantage of consolidation for investment purposes is now quite generally recognized for it insures any particular fund against loss and a greater degree of uniformity of income each year for the purpose for which each fund was created. The income of this Consolidated Fund is credited to the participating trust funds in proportion to the amount of principal of each. In no case has a Trust Fund been merged or has it lost its identity, but it has been more adequately protected so that the wishes of the donor may be realized.

Principal.

Amount of Fund,	\$2,700,914.93	Investments,	\$2,708,032.67
Profit,	1,719.40	Uninvested,	4,120.38
Gifts,	6,228.00		
Income to Principal,	3,290.72		
	<hr/>		<hr/>
	\$2,712,153.05		\$2,712,153.05

Income rate 5.0076%

NOTE:— The income rate on the Consolidated Investment Fund for the fiscal year was 5.0076%, as compared with 5.2545% in the preceding year. The rate for the current year would have been higher if the deposit of interest on bonds on July 1st had been entered on the books as of June 30th, as was the custom in previous years. Had this been done the rate of interest would have been 5.3432%. A comparable basis will be re-established at the close of the coming fiscal year.

FORMS OF BEQUEST.

(General.)

I give and bequeath to the Trustees of Trinity College, a corporation existing under the laws of the State of Connecticut, and located in the City of Hartford, in said State,..... dollars to be used at the discretion of said corporation.

(Specific.)

I give and bequeath to the Trustees of Trinity College, a corporation existing under the laws of the State of Connecticut, and located in the City of Hartford, in said State,..... dollars, in trust, to be used for the purposes following, that is to say:

(Here specify in detail the purposes.)

As in some States a bequest for charitable purposes is void unless the will is executed at least a certain length of time (varying in different States) before the death of the testator, and is attested by two or more credible, and at the same time disinterested witnesses, it is advisable to ascertain first the requirements of the law in the State in which the testator resides, and to be careful that such requirements are complied with.
